

ROOFING SHINGLES

Reference album

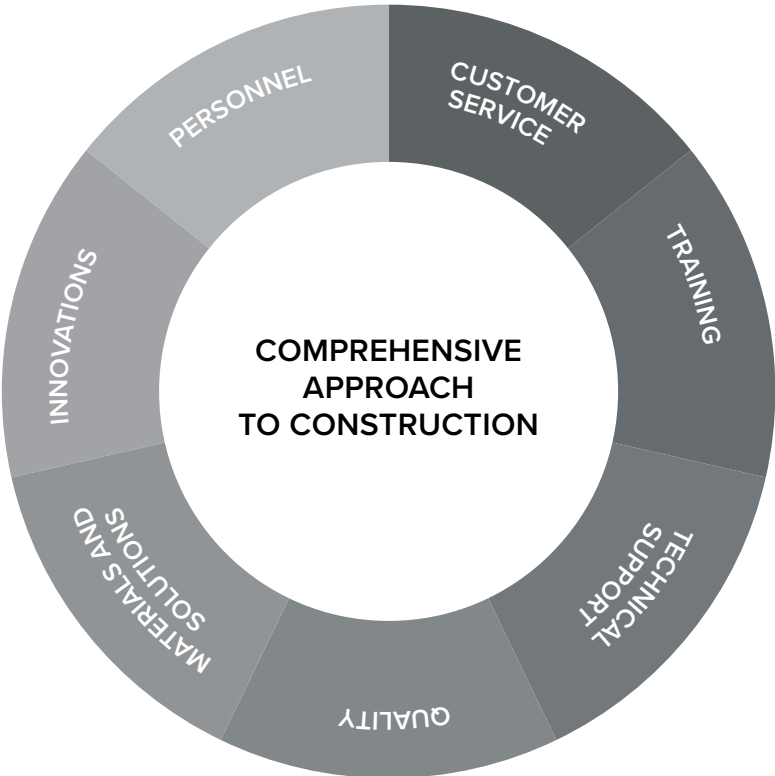

About the corporation

TECHNONICOL Corporation is a leading international manufacturer of reliable and efficient construction materials and systems. The company offers the up-to-date technologies combining both the development of proprietary Research Centers and the best international practices. TECHNONICOL Corporation cooperates with design institutes and architectural studios to flexibly and quickly respond to changes in consumer demands.

30

YEARS OF EFFICIENCY IN
PRODUCTION OF
CONSTRUCTION MATERIALS

Today, TECHNONICOL operates 63 production sites in 8 countries, 19 training centers, 6 research centers, and 22 representative offices in 18 countries. Products are shipped to 116 countries.

The high quality and wide range of technical and dimensional characteristics are the distinctive features of our products, which allow the customer to find the best material in terms of price and physical and mechanical properties.

Given the growing needs of regional markets, we streamlined the geography of our plants. Thus, we remain flexible and fast in the delivery of our products and eliminate the additional transport expenses for our customers.

Innovation

We are constantly developing and improving. All our innovations are aimed at reducing the impact on the environment and developing new innovative products aimed to help our planet and make people’s lives safer and more comfortable.

Our production capacities and equipment give us an ability to supply materials for large construction projects and to develop unique products based on individual requirements. We develop materials and solutions that meet global trends and needs in safety, energy efficiency, and the environment.

Advantages of TECHNONICOL's multi-layer shingles

IMPROVED ROOFING BITUMEN

Shingles are made of roofing bitumen free from synthetic additives affecting your quality of life. During the production of bitumen, it is oxygenated to increase the thermal resistance and durability of the roof.

RELIABILITY

Each new layer is a new level of reliability. Multi-layer shingles are the first-choice product for those who prefer the architectural solutions of the highest quality, advanced standards of durability and safety.

MULTI-LAYER STRUCTURE

Multi-layer structure of shingles is a guarantee of durability. Now you can be sure that the roof will serve more than one generation of your family!

MANUFACTURER'S WARRANTY

The manufacturer provides a warranty for the shingles for a period from 30 to 60 years depending on the collection.

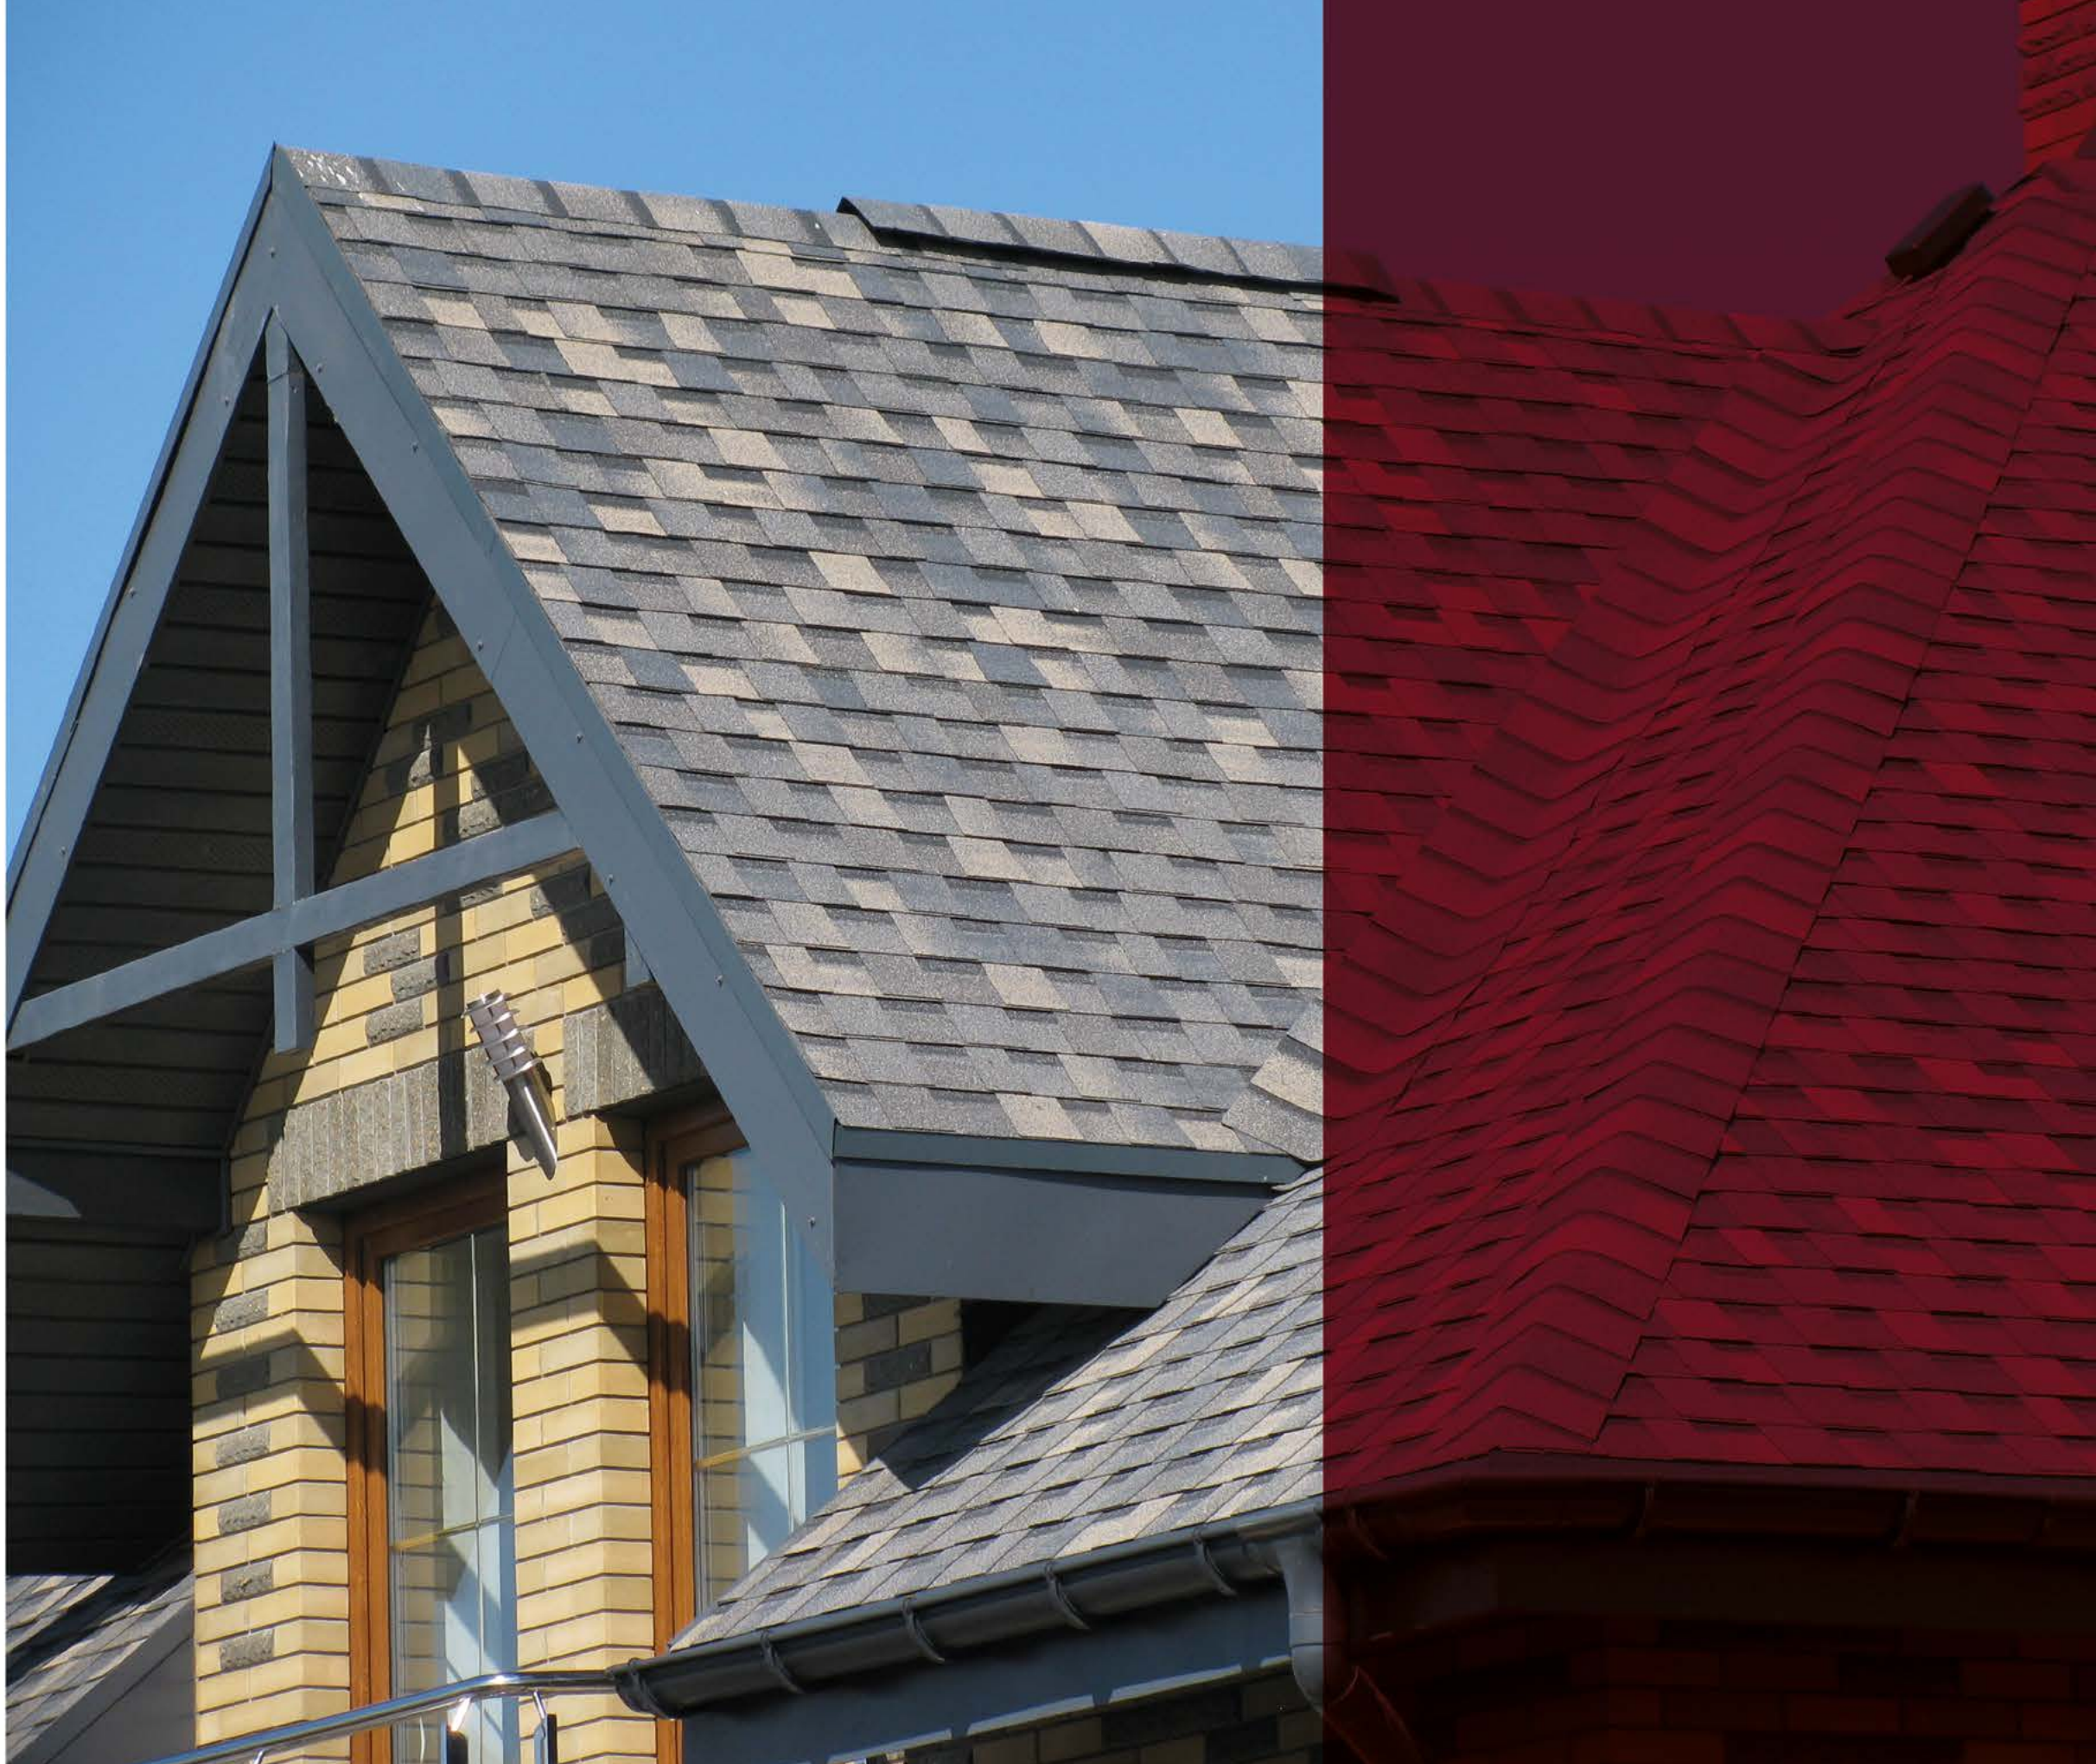

3D COLOR AND TEXTURE

Volumetric 3D color is a unique effect that is created through combinations of natural basalt granules of different shades. The color of the roof remains unchanged throughout its service life.

EASY APPLICATION ON SURFACES WITH COMPLEX GEOMETRY

The perfect solution for roofs with complex geometry of any shape and configuration. The material is used as a coating on pitched roofs with a slope of 12° or more.

Creativity
and design

Multi-layer flexible shingles.
