LOGICPIR is an innovative thermal insulation board made of PIR (Polyisocyanurate), which is used in flat and pitched roofing systems, floors, walls and facades. Being very rigid and perfectly flat, LOGICPIR is an ideal substrate for roofing materials. It has high compressive strength and a record low thermal conductivity value.

More than 95% of LOGICPIR board consists of closed rigid cells. The material does not absorb water and does not burn. It maintains stable parameters for a long period of time.

UNIQUE FEATURES OF LOGICPIR

RELIABILITY AND DURABILITY
Throughout its 50-year service life, LOGICPIR retains its qualities. It functions effectively within a temperature range from -65°C to +110°C being suitable for any climate.

HIGH FIRE RESISTANCE
LOGICPIR is a non-flammable material. When in contact with an open flame, polymer burns on the surface only. This creates a charcoal skin, which is an effective defence against further polymer damaging.

DYNAMIC LOAD RESISTANCE
LOGICPIR complies with class 2 for the dynamic load (EN 826). Compressive strength of 150 kPa provides high resistance against deformation due to operation loads.

RECORD-LOW THERMAL CONDUCTIVITY
LOGICPIR has a record-low thermal conductivity starting from 0.022 W/m²K. Boards have L-shaped edges, so they fit tightly together and thus prevent thermal bridges.

LIGHTWEIGHT
The use of LOGICPIR reduces the overall weight of the construction. This is especially important for roofs renovation. Transportation costs are substantially reduced as well.

MINIMAL WATER ABSORPTION
The board structure consists of closed rigid cells, which do not allow water to come into the material. The composite facers provide an additional vapor barrier.

ROOFING SYSTEMS

MECHANICALLY FIXED ROOFING SYSTEM
1. PVC membrane LOGICROOF V-RP
2. Mechanical fixation
3. Thermal insulation board LOGICPIR
4. Thermal insulation board LOGICPIR Slope
5. Thermal insulation board LOGICPIR
6. Vapor barrier VAPORSTOP CA 500
7. Corrugated steel sheet

BALLASTED ROOFING SYSTEM
1. Ballast
2. Geotextile 300 g/m²
3. PVC membrane LOGICROOF V-GR
4. Thermal insulation board LOGICPIR
5. Thermal insulation board LOGICPIR Slope
6. Thermal insulation board LOGICPIR
7. Vapor barrier VAPORSTOP CA 500
8. Reinforced concrete base
