

TECHNONICOL CORPORATION

COMPANY PROFILE

ABOUT TECHNONICOL CORPORATION

TECHNONICOL Corporation is the leading international manufacturer and supplier of roofing, waterproofing, thermal insulation and sound absorption materials. The Company was founded in 1992 and since then has accumulated considerable experience in the building materials market. We are proud to offer up-to-date products and technologies that combine global expertise and the elaboration of our own R&D centers. A wide range of durable materials and reliable solutions allows making a choice that is best suited to the customer both in price and in quality.

HEAD OFFICE IN INDIA: A STRATEGIC HUB

The head office of TECHNOMICOL was established in 2015 in India, positioning it as a key player in the Indian construction market. This strategic move allows the company to leverage local expertise, regulatory compliance, and cultural understanding to serve the rapidly growing Indian infrastructure sector. TECHNOMICOL is dedicated to building long-term partnerships with Indian partners, ensuring mutual growth and shared success.

All our products offered in India, as well as in any other region of the world, are subject to strict quality control according to EN, ASTM and local norms.

OUR MISSION, VISION AND CORE VALUES

OUR MISSION

To make high-quality, reliable, efficient construction materials and solutions available to every person in the world.

The company emphasizes global expertise, innovation, and sustainability, combining cutting-edge technology with a commitment to environmental responsibility. By integrating advanced R&D capabilities into its operations, TECHNOMICOL ensures that its products meet the highest standards of performance, safety, and durability.

SAFETY

Human life is the highest value in the Company. We not only strictly adhere to the existing safety rules but also constantly work to improve them. We respect the environment and conduct our business in a sustainable manner.

RELIABLE RELATIONSHIPS

We create long-term relationships with clients. We focus on the needs of customers and do our best to become a reliable regular partner for them. We take care of the client's trust and strive to justify it.

GOOD NAME

We value our reputation, which we have earned over the years of hard work. Our partners know: TECHNOMICOL is a synonym of reliability and decency. We appreciate this attitude and understand that our good name is our asset. Our methods and ways of realizing the mission are always ethical, and the efforts are oriented only to constructive goals.

TEAM SPIRIT

Each employee of the Company is extremely important: he brings his unique experience, knowledge and skills to the Company, makes it successful and different from other players in the market. Our team is a single living organism; we build relationships on mutual respect and support. Together we solve complex problems and achieve outstanding results.

PROFESSIONALISM AND CONTINUOUS IMPROVEMENT

We believe that every job should be carried out by a professional and strive to achieve this expertise in our daily work. We are confident that a true professional must constantly develop and improve in order to increase his craftsmanship.

INNOVATION AND SUSTAINABILITY

TECHNONICOL is at the forefront of building technology with its focus on energy efficiency, sustainability, and smart infrastructure:

- **Energy-Efficient Solutions:** Its products are designed to reduce operational costs and improve building performance.
- **Green Building Technologies:** The company integrates advanced materials and systems that enhance energy efficiency, reduce carbon footprints, and support eco-friendly construction practices.
- **Future-Proofing:** TECHNONICOL invests in R&D to develop next-generation solutions, such as smart roofing systems and adaptive insulation technologies.

Our Company is aware of its social responsibility to maintain a friendly environment and sustainable use of natural resources. That is why we invest in environmental protection more than

1 million dollars every year. We invest not only in pollution reducing factors at our factories, but also in construction systems that can minimize energy losses in the manufacturing industry and utility sector, as well as in new innovative products aimed to help our planet and make people's lives safer and more comfortable.

IMPACT ON INFRASTRUCTURE AND SOCIETY

TECHNONICOL's materials are used in a wide range of critical infrastructure projects:

- **Housing:** Providing durable, cost-effective solutions for residential construction.
- **Healthcare:** Supporting the creation of safe, comfortable hospital environments.
- **Transportation:** Enabling the development of airports, railways, and highways with high-performance materials.
- **Industrial Facilities:** Ensuring reliable operations in manufacturing and energy sectors.
- **Public Infrastructure:** Contributing to the construction of bridges, schools, and urban developments that improve quality of life.

We are 100% sure of what we produce and are happy to serve the construction industry with our experience, reliable solutions and premium quality products.

COMPETENCE ON TOP

We believe that buildings are more than just walls and roofs and we know that the world of waterproofing is varied and highly specialized at the same time. With our high-quality products, we offer you reliable solutions for all applications.

TECHNONICOL's construction solutions provide environmental friendliness, comfort and aesthetic appeal of the space where people live, work or spend their free time.

Whether it's a new building or refurbishment of existing buildings, a green roof or traditional pitched roof, foundation of trade center or tunnel for railway station, we at TECHNONICOL have the perfect solution for every situation.

We know what matters.

Concentrate fully on your ideas. Our mission is to develop high-quality, reliable and efficient building envelope solutions and make them available worldwide. That is why our technical consultants and application engineers are always ready to advise you from the very beginning and develop solutions that meet your ideas from a technical, economic, functional and design point of view.

We know that the problem is usually in the details. Therefore, it is never too early to involve our specialists in the design process. With our system partner concept, we cover all technical, design and legal requirements and provide support at all stages of the project.

QUALITY ASSURANCE AND STANDARDS

TECHNONICOL's products are rigorously tested and certified to meet international standards:

- **Global Standards:** Compliance with EN, ASTM, and local regulations.
- **Certifications:** Export plants have obtained UNI EN ISO certification, ensuring consistent quality throughout the supply chain.
- **Third-Party Validation:** Products are backed by a wide range of certificates and test reports from leading institutes, research centers, and independent laboratories worldwide.

Quality of TECHNONICOL products is proved by a great number of certificates and test reports released by many leading institutes and science centers around the world. Standards of quality in manufacturing are a part of our company culture: implemented standards of Lean production.

Many of our products have had a lasting impact on the industry. As a technological leader, TECHNONICOL is constantly improving most of its material range. In an effort to always offer optimal quality products for all applications, we constantly invest in research and development.

CONTINUOUS IMPROVEMENT

TECHNONICOL is committed to ongoing innovation and excellence:

- **Focus:** The company maintains state-of-the-art R&D centers dedicated to developing new materials and technologies.
- **Customer-Centric Approach:** By listening to client feedback and adapting to market needs, TECHNONICOL ensures its products remain relevant and competitive.
- **Sustainability Goals:** The company aims to reduce environmental impact through circular economy practices and green manufacturing.

Research and implementation of advanced technologies allow TECHNONICOL to bring new products and many product variations depending on customer needs each year.

In cooperation with the research and development centers, our factories have obtained a number of product certificates issued by many prestigious institutes around the world.

UNIQUE MATERIALS TAILORED ESPECIALLY FOR YOU

Our production capacities and equipment give us the ability to supply materials for large construction projects and to develop unique products based on individual requirements.

Competence of employees, professional technical consultations, development of new materials in our own R&D center, quality of products and reliability of solutions – all of these allow TECHNONICOL to approach each client individually and help us to meet every customer's expectations and needs.

A PARTNER YOU CAN TRUST

As a respected expert, our company is focused on an individual approach to each client, we maintain business relationships with architects, designers and roofers. We believe that relationships are built on mutual trust and respect. Personal, professional, direct - from product consultation, project planning and design, to on-site construction support, we offer a customized service.

We believe that we can achieve mutual trust, by being reachable and setting clear conditions for all of our partners. Thanks to our many years of experience sharing ideas with architects, developers and builders, we know that our high quality materials and solutions create the conditions for the successful realization of your ideas and visions.
